

Architectural Assistant – Part II

Goldstein Heather is seeking a highly motivated and design-focused Part II Architectural Assistant to join our central London studio with immediate availability.

We are a design-led practice working across residential, heritage and mixed-use projects at a range of scales. We are particularly interested in candidates who are passionate about architecture as a craft, and who enjoy developing ideas through drawing, modelling and making.

This role is central to the creative output of the studio. You will support project teams across early-stage design, feasibilities, pre-applications and planning submissions, while also contributing to visualisation, presentation and technical drawing work across the practice.

The role

- Supporting project teams across RIBA Stages 0-2, with exposure to later stages where appropriate
- Producing high-quality drawings, models and visuals to support design development
- Assisting with feasibilities, pre-applications and planning submissions
- Creating clear and compelling presentation material for clients and local authorities
- Contributing to in-house visualisation and image production across the studio
- Assisting with drawing packages and technical coordination where appropriate
- Working collaboratively while developing increasing autonomy and confidence

This role is ideal for someone who enjoys being deeply involved in the design process and contributing across multiple projects.

About you

- Part II qualified, with at least 1-2 years' experience in practice preferred
- Experience working in a small or medium-sized, design-focused studio
- A strong, well-curated portfolio demonstrating design thinking, clarity and craft
- Strong visual and graphic sensibility, with excellent attention to detail
- Confident in architectural drawing, 3D modelling and visualisation
- Comfortable producing presentation material and imagery to a high standard
- Organised, proactive and comfortable working across multiple projects
- Some technical and construction experience would be beneficial

Software & BIM

- Experience using Revit is required
- Day-to-day work will initially be undertaken in MicroStation, with training and support provided
- You will contribute to the practice's planned transition to Revit in Q1/Q2 2026, working alongside senior staff and an external BIM consultant
- Proficiency in SketchUp, V-Ray and Adobe Creative Suite is essential

What we offer

- The opportunity to work in a respected, design-led studio at an exciting stage of growth
- Exposure to a wide range of high-quality projects
- Close collaboration with experienced architects and directors
- A supportive environment focused on learning, craft and design excellence
- Hybrid working, flexible hours and studio socials
- Salary depending on experience

Please submit a CV and portfolio by email to recruitment@goldsteinheather.co.uk.

Portfolios should not exceed 5MB.
